

A great place to start your research! You can quickly discover relevant information on any topic from across the library's collections.

SEARCH >

Searching is like searching the open Web, so start with a few keywords. If you are searching for a known item, you might want to try the Advanced Search option.

University Library search bar with the text 'cuba' entered and a 'Search' button.

Enter search terms in the single search box, or select the down-arrow to the right of the search button to use the Advanced Search form to create a more specific query using fielded search options and Boolean operators.

NAVIGATE RESULTS >

Once you have a set of results, there are many options to help you explore topics, narrow your results set, and refine your search query. Recommendations and suggestions for other resources or search terms are also provided.

The screenshot shows the University Library search results for 'text mining'. The page includes a sidebar with filters for 'REFINE YOUR SEARCH' (Any, Full Text Online, Scholarly & Peer-Review, Peer-Review, Library Catalog), 'CONTENT TYPE' (Any, Book / eBook, Journal Article, Newspaper Article, Dissertation/Thesis, Book Review, More...), 'DISCIPLINE' (Any, engineering, history & archaeology, economics, applied science, computer science, More...), and 'PUBLICATION DATE' (mm/dd/yyyy to). The main results area shows 423,846 results sorted by relevance. A callout points to the 'Sort results by relevance or date.' link. Another callout points to the 'Text mining with MATLAB: electronic resource' by Bancho, Rafael E. 2013. A third callout points to the 'GPU-Accelerated Text Mining' by Angela Zoss. A fourth callout points to the 'Text mining' article from Wikipedia. A fifth callout points to the 'Suggested Librarian' section, which lists Susan Presley. A sixth callout points to the 'Related Topics' section, which lists data mining, marketing research process, and exploratory research. A seventh callout points to the 'Recommended Research Guides' section, which lists 'About Text Analysis - Introduction to Text Analysis' by Angela Zoss.

Sort results by relevance or date.

Your query may automatically be expanded to include additional keywords and spelling variations. If precision searching is desired, click the link to just search the search terms entered.

Based on your search query terms, the Topic Explorer pane may appear on the right providing relevant topical reference content and suggestions for librarians to contact, recommendations for research guides to explore, and more.

Refine using facets and filters to narrow or expand results. Options include discipline, date, content type, subject, and more. Facets may change and get more granular as you navigate your search results.

Based on your search query, you may also see:

VIEW RESULTS AND ACCESS CONTENT >

After you've identified an item of interest, you can access or locate the content, or use other features to further aid you in your research.

Save items to your folder for citation export, emailing and printing during your session. Or using the buttons in the right pane, cite or email a single item.

Image and label indicate type of content and the availability of the item online at your library.

View additional information about the item in the right pane by hovering over the title. You can conduct new searches by clicking on the subject, author, or other terms.

Government Formation in Parliamentary Democracies
by Martin, Lanny W; Stevenson, Randolph T
Research on government formation in parliamentary democracies is replete with theoretical arguments about why some coalitions form while others do not. Unfortunately, this theoretical richness has not led to the development of an empirical tradition that allows scholars to evaluate the relative importance of competing theories.
